XM Radio is the best advance to happen to radio in a long time. My husband and I enjoy the pleasure of many kinds of music--advertisement free--in our home and in our car. The choices we are provided with are without match anywhere else. We have "sold" the XM radio with its numerous offerings to relatives and friends. We were "sold" by our son who listens to XM as he travels in his work. We also listen often to the weather and traffic stations to keep up with the locations of our children and other family members throughout the United States. We have personally used the weather and traffic reports when we travel to Virginia to see family and friends.

We especially enjoy the old time music over the rap, today's noise, and the chatter of DJ's on local stations who are insensitive to the needs and listening enjoyment of the audiences. We prefer to pay for quality music as opposed to opinions, obscenities and foolishness over the air waves.

We will continue to listen to what we want to hear and encourage others to enjoy their choice of music without interruption.
